

## Science Presentation

### Oviparous – vs – Viviparous

Directions: Below you will write your presentation on the animal that you were assigned. In your written presentation, you need to make sure that you completely explain what type of offspring your animal has and how long they carry their offspring, what type of delivery they have such as an egg or a live animal. If your animal that you have been assigned has eggs, then how long before the eggs hatch. Also, you need to put in your written presentation where your animal has its offspring and what is the nutrition of your animal, a carnivore, herbivore, or an omnivore. Depending on what your animal is, is to what they eat. Tell me exactly what they eat! This is due in two days! Use this form to write your presentation on. You must have correct punctuation, correct spelling, and correct capitalization. This counts as two grades.
