

2 Which one?

Find the answer: beehive house, stilt house or cave house.

Different kinds of homes

Beehive houses

These houses are called beehive houses. Beehive houses are made of mud, water and dry grass. People build beehive houses in some hot, dry places. The mud walls and very small windows keep the homes cool.

Cave houses

Cave homes are built in rocks and mountains. Some cave homes are very old. Cave homes stay cool during the summer. They stay warm during the winter.

Stilt houses

In some hot, wet places, people build houses on stilts. Stilt houses are built high above the water or land. The 'stilts' are tree trunks. The air blows under the houses and keeps them cool.

Skyscrapers

In cities all over the world, people live in tall buildings called skyscrapers. Skyscrapers are made of metal, concrete and glass. This skyscraper has more than 160 floors and 57 lifts.

2 Which one?

Find the answer: beehive house, stilt house or cave house.
