

Practica de distribuciones

1. Determina el valor de "x"

$$12 + 8 - 3 = 17$$

	+		-		=	
--	---	--	---	--	---	--

	+		-		=	
--	---	--	---	--	---	--

	=	
--	---	--

2. Determina el valor de "x"

	x		+		=	
--	---	--	---	--	---	--

	x		+		=	
--	---	--	---	--	---	--

	x		+		=	
--	---	--	---	--	---	--

	=	
--	---	--

3. Determina el valor de "x" en cada distribución:

↓

73	93	81
19	27	35
54	x	46

=

→

77	23	54
42	17	x
67	45	22

=

↓

13	7	15
2	5	3
26	35	x

=

→

24	2	12
x	5	11
18	6	3

=

↓

20	50	32
4	x	8
5	10	4

=

→

x	27	93
46	19	65
54	24	78

=
