backward

I have a toy car.

When I \_\_\_\_\_ the toy car, it \_\_\_\_\_ moving.

After a while, the toy moves slower. I push the toy car in the same direction that it is moving, the toy car moves \_\_\_\_\_.

I catch the moving toy car and pull it slowly closer to me. It changes \_\_\_\_\_ and moves \_\_\_\_\_.

When I stop pulling the toy car, it \_\_\_\_\_ moving.

Now I play the toy car using height ramp.

The toy car moves \_\_\_\_\_ and \_\_\_\_\_ then when I play it with no ramp.

Self reflection: (tick ✓ the picture)

I can do the task by myself

I need a little help

I need a lot of help
