

Write the correct letter or number to match the materials and the instructions with the pictures

Paper Handprint Bunnies

Make these handprint bunnies using any kind of paper, any kind of pens, pencil crayons or markers and a pair of scissors. That's all you need!

Total Time: 10 mins

Materials

- A. Paper
- B. Markers (crayons or pencil colours)
- C. Pencil
- D. Black pen (or black colour)
- E. Scissors

Instructions

1. **Trace** a handprint. BUT **make** the handprint slightly fatter than you normally would. **Don't trace** tightly around the fingers or the ears and arms will look really skinny.
2. **Cut** out the handprint. **Make** sure you have a V at the bottom between each finger (rather than a curve).
3. **Cut** a small slit beside the baby finger. The bottom of the cut should line up with the bottom of the space beside the thumb. **Trim** the baby finger to fix the shape where you cut. (optional)
4. **Fold** down the baby finger and thumb towards the center to make the bunny arms.
5. **Cut off** the middle finger so you're left with two finger "bunny ears".
6. **Use** a pink marker, pen or pencil crayon to draw the pink parts of the ears. Then **draw** an oval for the rabbit's nose.
7. Using a black gel pen, regular pen or marker, **draw** the rest of the face - eyes, whiskers and mouth.
8. Finally **draw** two little paws at the bottom of the handprint to make the bunny's feet.
9. Your paper bunny is complete!
