

**LESSON 1 Searching for Food**

In this lesson, you will read two texts about bugs and answer questions.

**TEXT 1 Where to Find Bugs**

Ants are **tiny bugs**. They live in **nests**.

**Pill bugs** like dark, **damp** places. They live under **logs** and **dead leaves**.

Worms live under **stones** and in **soil**.

**VOCABULARY**

tiny bugs nests pill bugs damp logs dead leaves stones soil

**Instructions:** Choose the correct answer, **A**, **B**, or **C**.

1	Ants are _____ bugs.  A giant B large C small
2	Which insects live under logs and dead leaves?  A ants B pill bugs C worms

**TEXT 2 | Ant Trail Experiment**

This **experiment** shows how ants follow trails.

You will need:

- Ant nest
- **Piece** of paper
- Piece of apple
- Soil

Instructions:

1. Put the apple on the paper next to the nest.
2. **Watch** the ants go to the apple.
3. Now **move** the apple.
4. Put some soil over the trail. The ants will run around and then make a new trail.

**VOCABULARY**

experiment

piece

watch

move

**Instructions:** Choose the correct sentence, **A**, **B**, or **C**.

3

The apple is put next to the \_\_\_\_\_.

- A** soil
- B** paper
- C** nest

4

What happens when you move the apple?

- A** The ants run around.
- B** The ants play.
- C** The ants eat the apple.

5

What is TEXT 2 showing us?

- A** how ants follow trails
- B** where ants live
- C** why ants eat food

**TEXT 3 Searching for Food**

**Instructions:** Draw three bugs below and write their names.
