Earth Day

The first Earth Day was in April, in It marked the beginning of an environmental movement around the world. It started in the and then it spread throughout the world.

The first time, thousands of people from College and High Schools led a demonstration against It all started due to the high levels of in that city. As a result, citizens couldn't see the blue..... It seemed that it was a day. Moreover, water was too owing to the fact that industries threw their waste to streams and

Young people organized in order to debate some specific topics and get the attention of many others who wanted a change. The main objective was to raise of the problematic and the impact of human activity on the

The 22nd, April was chosen because before the day was celebrated. It tried to make people conscious about deforestation and they tried to encourage people to plant and re forest the woods.

The movement went in 1990 when 200 million people joined the movement and helped pave the way for the United in Rio de Janeiro.
