Wypełnij luki odpowiednimi słowami.

EPIDEMICS OF FLU

Almost every year an epidemic of flu 1 out all of a sudden. In fact, it's fairly predictable, but people still like to think that this year, they somehow won't get ill. 2 doctors' warnings and strong encouragement to prevent the disease by using the simplest method – vaccination, most people neglect this problem until they 3 sick. Why is it 4? That's the question... In my opinion, some people don't want to spend any money on the vaccine, even though it is not expensive at all. Others may be afraid of injections because they think they are all painful. Well, this one is not, and besides, it's very small. Workaholics are busy all the time, and they say they don't have time to take care 5 it. Don't they realise that 6 an appointment with their doctor takes up much less precious time than staying in bed for several days? Moreover, there's a chance that complications may develop, for example bronchitis or pneumonia. So what's the conclusion? Most people aren't 7 reasonable or responsible because they do nothing to protect 8 themselves or other people from this dangerous disease.
