

## Chocolate Expert

### Read the text

Cadbury is a famous British chocolate **brand**. It has 300 scientists. They make new types of chocolate.

One scientist is very important to Cadbury. She has very good **taste buds**. Cadbury wants to protect her taste buds. The company **insures** her taste buds for 1 million pounds.

The scientist must be careful. She must protect her taste buds. She must not eat fugu fish. She must not eat some chilli peppers. However, she can eat chocolate and get money for it!

Difficult words: **brand** (a business), **taste** (put something in your mouth to know what it is like), **taste buds** (the things on your tongue that let you taste things), **insure** (if you insure something, you get money if something bad happens to it).
