**How Do You Imagine the Future?**

Viernes

One of the most recognized films about the future is Wall-e. In 2008, Disney's Pixar released a movie about Wall-e, a lonely robot that lives in 2805. The movie shows an abandoned planet. The only survivors on the Earth are Wall-e and its friend, a cockroach. A special ship, Axiom, floats in the space and makes occasional checks to see if the earth is fit to return, always with negative results. Wall-e is a film that manages to convey an idea of what the future could be without the need of many words. Many characters have no voices. Wall-e deals with serious issues such as waste management, consumerism, environmental impact, obesity, or corporatism. #### Hollywood Sequels

With many releases, 2020 promises to be a year full of blockbusters. In January a remake of the horror film “Grudge”, the Japanese movie about a vengeful ghost will come out. Also in January Just Mercy, a movie about a lawyer fighting for the civil rights of an inmate sentenced to death will be released. Also, Bad Boys for Life, an action and comedy film starring Will Smith will come out. It is a sequel to Bad boys 1 and 2 released in 1995 and 2003.

Legally Blonde 3 will be released 15 years after the last film. Reese Witherspoon returns to play her role as Elle Woods, a blonde lawyer. The Disney live-action Mulan will come out in February. And in April “Bond 25” will be released. The protagonist will be once again, and perhaps for the last time in this character, the Englishman Daniel Craig. The second part of the low-budget film that managed to raise millions, “A quiet place” by the couple John Krasinski and Emily Blunt, will be released on May 15th.
