

Name: \_\_\_\_\_

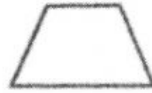

## Review

A) Choose the correct name and equation.

Rectangle

Rhombus

Trapezoid

Square

$$\frac{4}{6}$$

Four  
sixths

Six  
quarters

B) Choose True or False.

$\frac{1}{4}$  is equivalent to  $\frac{3}{8}$

True

False

$\frac{3}{4}$  is the simplest form of  $\frac{9}{12}$

True

False

C) Choose the correct word answer.

Tom has a parallelogram picture that is 15cm in height and has a base of 4cm.  
What is the area of the parallelogram picture?

A)  $11\text{cm}^2$

B)  $19\text{cm}^2$

C)  $60\text{cm}^2$

D)  $80\text{cm}^2$

Mai has  $\frac{4}{10}$  of an apple. She eats  $\frac{2}{10}$  of apple as fast as she can.

How much of the apple does Mai have left?

A) Mai has  $\frac{1}{5}$  of the apple left.

B) Mai has  $\frac{3}{5}$  of the apple left.

Nev can lift a weight  $\frac{4}{8}$  of a kilogram. Alex can lift a weight of  $\frac{3}{8}$  of a kilogram.

How much of a kilogram can they lift in total?

A) They can lift  $\frac{1}{8}$  of a kilogram in total.

B) They can lift  $\frac{7}{8}$  of a kilogram in total.

D) Solve the stories. Write an equation and word answer.

Tom has  $\frac{1}{6}$  of a pizza. John has 5 times as much pizza as Tom.

How much pizza does John have?

Equation: \_\_\_\_\_

Word answer: \_\_\_\_\_.

A relay race is 6 kilometers long. Each person will run  $\frac{1}{2}$  of a kilometer.

How many people are needed to complete the race?

Equation: \_\_\_\_\_

Word answer: \_\_\_\_\_.

E) Solve and explain for the story.

Gary has a baby cat. It is 40cm tall. It grows  $\frac{1}{2}$  of a cm every week.

Gary says after 12 weeks it will be more than 45cm tall.

Is he correct? Explain

Word answer:

---

---
