

## Forces and moments

- 1 Find (i) The moments due to **each force** and its corresponding direction.  
(ii) The resultant moments and its direction.  
Assume the plank has negligible mass.

(a)

### Working and answers

Moments due to $F_1$	
Moments due to $F_2$	
Moments due to $F_3$	
Moments due to $F_4$	
Total clockwise moments	
Total anti-clockwise moments	
Resultant moment	
Direction of rotation	

### Model answers – enter in this format

Moments due to $F_1$	56Nm clockwise
Moments due to $F_2$	14Nm clockwise
Moments due to $F_3$	40Nm anticlockwise
Moments due to $F_4$	16Nm anticlockwise
Total clockwise moments	70Nm
Total anti-clockwise moments	56Nm
Resultant moment	14Nm clockwise ('0' if there is no R.M.)
Direction of rotation	Clockwise

(b)

Working and answers

Moments due to $F_1$	
Moments due to $F_2$	
Moments due to $F_3$	
Moments due to $F_4$	
Total clockwise moments	
Total anti-clockwise moments	
Resultant moment	
Direction of rotation	

(c)

Working and answers

Moments due to $F_1$	
Moments due to $F_2$	
Moments due to $F_3$	
Moments due to $F_4$	
Total clockwise moments	

Total anti-clockwise moments	
Resultant moment	
Direction of rotation
