

Extreme sports are dangerous and should be banned

1. Read the opposer's argument and write a response against the statements made.
2. Provide evidence to state your point of view.

The opposing argument

Recent research has proven that you are more likely to be injured playing football or basketball than when you are surfing or mountain biking. So, if we were to say that extreme sports need to be banned because of the risk involved, then we should also need to ban these more traditional sports. We can't do that because we all need to stay fit and well. Therefore, extreme sports are necessary for keeping young people healthy.
