

1. Completa cada esquema para descomponer los números en árboles de factores.

$$64 = x \times x \times x \times x \times x$$

$$64 =$$

$$225 = x \times x \times x$$

$$225 = x$$

2. Realiza divisiones sucesivas para descomponer cada número en factores primos.

a. 525

$$525 = \times \times \times$$

$$525 = \times \times$$

b. 468

$$468 = \times \times \times$$

$$468 = \times \times$$
