

Problemas de resta reagrupando

Juan tiene una caja con 500 cajitas de grapas, regaló 322. Ahora, ¿cuántas cajitas de grapas le quedan?

A diagram showing base ten blocks for the subtraction problem 500 - 322. The minuend 500 is represented by one hundred block (a large square) and two ten blocks (smaller squares) in the top row, and five ten blocks in the bottom row. The subtrahend 322 is represented by three ten blocks in the top row and two one blocks (very small squares) in the bottom row. A minus sign is between the two groups, and an equals sign is followed by three empty boxes for the result.

$$500 - 322 = \square\square\square$$

Ahora le quedan _____ cajitas de grapas.

Los empleados del Mcdonal prepararon 627 hamburguesas. De esas hamburguesas vendieron solamente 469. ¿Cuántas hamburguesas le quedaron por vender?

A diagram showing base ten blocks for the subtraction problem 627 - 469. The minuend 627 is represented by six hundred blocks (large squares) in the top row, two ten blocks (smaller squares) in the second row, and seven one blocks (very small squares) in the third row. The subtrahend 469 is represented by four hundred blocks in the top row, six ten blocks in the second row, and nine one blocks in the third row. A minus sign is to the left of the blocks, and a horizontal line is drawn below the third row. Below the line are three empty boxes for the result.

$$627 - 469 = \square\square\square$$

Le quedaron _____ hamburguesas por vender.

En un hotel hay 780 habitaciones 394 están ocupadas. ¿cuántas habitaciones están desocupadas?

Están desocupadas _____ habitaciones.

EXCELENTE TRABAJO!!!!
