- Our reproductive system allows us to have

- Men and women have reproductive systems.

- The female reproductive system produces eggs/ovules in the

- The male reproductive system produces sperm in the

- Sometimes a sperm from the man an egg/ovule from the woman.

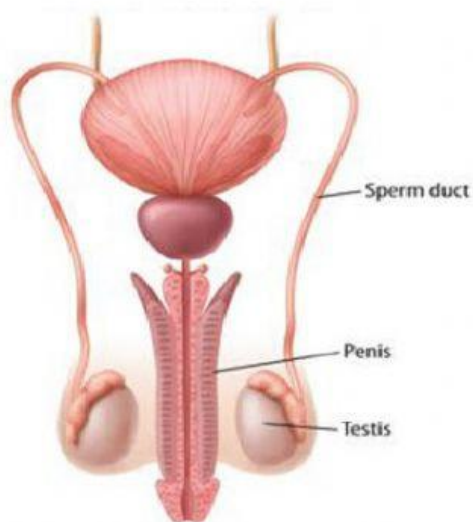

- The fertilised egg goes to the

- The fertilised egg changes into an

and gets bigger.

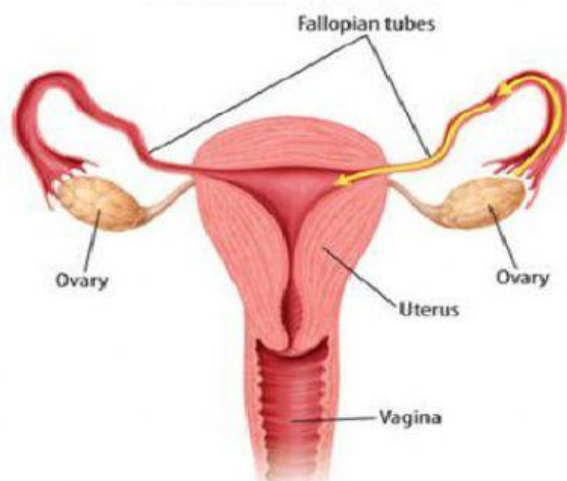

- 9 months later a is born.

Male

The organs of the male reproductive system produce sperm and deliver it to the female reproductive system.

Female

The female reproductive system produces eggs and provides a place for a new human to grow and develop before birth.
