

## When Two Fronts Meets

NAME:

CLASS: 7/

Q1: Refer to ALEF 151 to summarize then drag and drop to complete the following table correctly:

| Type             | Illustrating images | What will happen? |
|------------------|---------------------|-------------------|
| Warm front       |                     |                   |
| Cold front       |                     |                   |
| Stationary front |                     |                   |

Apply and forecast:

What kind of clouds will appear in the **opposite case**?
