

Sumas doble

$2 + 2 = \square$

$1 + 1 = \square$

$3 + 3 = \square$

$4 + 4 = \square$

$5 + 5 = \square$

$6 + 6 = \square$

$7 + 7 = \square$

$8 + 8 = \square$

$9 + 9 = \square$

Sumas triple

$1 + 1 + 1 = \square$

$2 + 2 + 2 = \square$

$3 + 3 + 3 = \square$

$4 + 4 + 4 = \square$

$5 + 5 + 5 = \square$

$6 + 6 + 6 = \square$

$~~7~~ + ~~7~~ + 7 = \square$

$8 + 8 + 8 = \square$

$9 + 9 + 9 = \square$

Deduce

$1 + \square = 10 \quad \rightarrow 11 + \square = 100$

$1 + \square = 20 \quad \rightarrow 21 + \square = 100$

$1 + \square = 30 \quad \rightarrow 31 + \square = 100$

$1 + \square = 40 \quad \rightarrow 41 + \square = 100$

$1 + \square = 50 \quad \rightarrow 51 + \square = 100$

$1 + \square = 60 \quad \rightarrow 61 + \square = 100$

$1 + \square = 70 \quad \rightarrow 71 + \square = 100$

$1 + \square = 80 \quad \rightarrow 81 + \square = 100$

$1 + \square = 90 \quad \rightarrow 91 + \square = 100$

$1 + \square = 100$

$2 + \square = 10$

$2 + \square = 20$

$2 + \square = 30$

$2 + \square = 40$

$2 + \square = 50$

$2 + \square = 60$

$2 + \square = 70$

$2 + \square = 80$

$2 + \square = 90$

$2 + \square = 100$

$22 + \square = 100$

$22 + \square = 100$

$32 + \square = 100$

$42 + \square = 100$

$52 + \square = 100$

$62 + \square = 100$

$72 + \square = 100$

$82 + \square = 100$

$92 + \square = 100$

$3 + \square = 10$

$3 + \square = 20$

$3 + \square = 30$

$3 + \square = 40$

$3 + \square = 50$

$3 + \square = 60$

$3 + \square = 70$

$3 + \square = 80$

$3 + \square = 90$

$3 + \square = 100$

$13 + \square = 100$

$23 + \square = 100$

$43 + \square = 100$

$33 + \square = 100$

$53 + \square = 100$

$63 + \square = 100$

$73 + \square = 100$

$83 + \square = 100$

$93 + \square = 100$
