

The Breathing Process

Order the steps in the breathing process correctly.

STEP 1

STEP 2

STEP 3

STEP 5

STEP 4

Air enters the air sacs (alveoli).

Air travels to the trachea.

Air reaches the capillaries.

Air travels through the bronchi to the bronchioles.

Breathe in through your nose and mouth.

Use the words in the box to label the diagram correctly.

- air sacs (alveoli)
- trachea
- bronchioles
- lungs
- bronchi
