

Investigating Living and Non-Living things in Our Environment

1. Choose any object from anywhere in your environment. Name it.

2. Write your answer in the box.

2. Make a scientific guess.

Write Yes or No in the box for your answer.

- I think the object I chose is a living thing.
- I think the object I chose is a non-living thing.

3. Now test your scientific guess by writing YES or No.

Does it move?

Does it grow and change?

Does it breathe?

Does it make young ones?

Does it excrete waste

Does it feed?

4. Results.

Write YES or NO to indicate your results.

It is a non-living thing

It is a living thing

6. Conclusion.

Can you now tell the difference between a living and non-living thing?

Write YES or No in the box to indicate your answer.

7. Explain in your own words, explain what you understand about living and non-living things.
