During history, people used different ways to communicate with each other. For example, one of the old ways was the "messenger bird". Now we can't imagine how the birds communicate with people as we use the Internet, cell phones or smart phones now. Not many years ago, only about 100 years ago, people did not guess anything about these inventions. They only had the telegraph and the telephone, but they could not have or use them easily. Now, we can't guess the future communication methods. What will the inventors invent 100 years later?

5. Which of the communication ways DOES NOT show the thing in the text above?

In my opinion, the Internet is one of the best inventions of the 21st century. There have been too many useful inventions like telephone, television, washing machine,

car... But I think, the Internet is one of the best, because it connects people to the world. They can do so many things via the Internet. First, they can work through the Internet. They don't need to go to work, they can do their work at home and even they have a meeting with the people from other countries. Second, they buy whatever they want like food, clothes, equipment, computers, smartphones, plane tickets, even cars... Third, people meet via the Internet and see each other if they have a camera. We can talk about more advantages of it. We are lucky.
