Warmer Climate on the Earth May Be Due To More Carbon Dioxide in the Air

By WALDEMAR KAEMPFERT

The general warming of the climate that has occurred in the last sixty years has been variously explained. Among the explanations are fluctuations in the amount of energy received from the sun, changes in the amount of volcanic (New York Times; taken from the archives 1956)

starches) causes a large loss of carbon dioxide, but the balance is restored by processes of respiration and decay of plants and animals. Despite nature's way of maintaining the balance of gases the amount of carbon dioxide in the

“We must reject the perennial prophets of doom and their predictions of the apocalypse

“I don't believe it.

The concept of global warming was created by and for the Chinese in order to make U.S. manufacturing non-competitive.

I don't think it's a hoax. I think there's probably a difference. But I don't know that it's manmade.

Donald J. Trump

“The environment is very important to me. Someone wrote a book that I'm an environmentalist

It's freezing in New York — where the hell is global warming?

The badly flawed Paris Climate Agreement protects the polluters, hurts Americans, and cost a fortune. NOT ON MY WATCH!

“The United States will join one trillion trees initiative
