

ANGLES IN A TRIANGLE

$$\hat{A} + \hat{B} + \hat{C} = 180^\circ$$

Find the missing angle in each the following triangles:

$$49^\circ + 47^\circ + V = 180^\circ$$

$$V = \quad^\circ$$

$$39^\circ + 114^\circ + Y = 180^\circ$$

$$Y = \quad^\circ$$

$$91^\circ + 37^\circ + T = 180^\circ$$

$$T = \quad^\circ$$

$$45^\circ + E + F = 180^\circ$$

$$F = \quad^\circ$$

$$44^\circ + 57^\circ + X = 180^\circ$$

$$X = \quad^\circ$$

$$60^\circ + 60^\circ + B = 180^\circ$$

$$B = \quad^\circ$$

$$\quad^\circ + \quad^\circ + T = 180^\circ$$

$$T = \quad^\circ$$

$$^\circ + ^\circ + A = 180^\circ$$

$$A = ^\circ$$

$$^\circ + ^\circ + B = 180^\circ$$

$$B = ^\circ$$
