

Latihan 7

Menukar peratus kepada pecahan perseratus dan permudah pecahan.

$$0. \quad 15 \% = \frac{15}{100} = \frac{\cancel{5} \times 3}{\cancel{5} \times 20} = \frac{3}{20}$$

$$1. \quad 35 \% = \frac{35}{100} = \frac{\cancel{5} \times 7}{\cancel{5} \times 20} = \frac{7}{20}$$

$$2. \quad 45 \% = \frac{45}{100} = \frac{5 \times 9}{5 \times 20} = \frac{9}{20}$$

$$3. \quad 55 \% = \frac{55}{100} = \frac{5 \times 11}{5 \times 20} = \frac{11}{20}$$

$$4. \quad 25 \% = \frac{25}{100} = \frac{\cancel{25} \times 1}{\cancel{25} \times 4} = \frac{1}{4}$$

$$5. \quad 75 \% = \frac{75}{100} = \frac{25 \times 3}{25 \times 4} = \frac{3}{4}$$

$$6. \quad 60 \% = \frac{60}{100} = \frac{\cancel{20} \times 3}{\cancel{20} \times 5} = \frac{3}{5}$$

$$7. \quad 80 \% = \frac{80}{100} = \frac{20 \times 4}{20 \times 5} = \frac{4}{5}$$

$$8. \quad 50 \% = \frac{50}{100} = \frac{\cancel{50} \times 1}{\cancel{50} \times 2} = \frac{1}{2}$$

$$9. \quad 4 \% = \frac{4}{100} = \frac{\cancel{4} \times 1}{\cancel{4} \times 25} = \frac{1}{25}$$

$$10. \quad 8 \% = \frac{8}{100} = \frac{4 \times 2}{4 \times 25} = \frac{2}{25}$$

SILA HAFAL

$$5 \times \square = 100$$

$$25 \times \square = 100$$

$$20 \times \square = 100$$

$$50 \times \square = 100$$

$$4 \times \square = 100$$
