

Life Cycle of a Bean Plant.

Look at the diagram.

Read. Write numbers from 1 to 6 to put the sentences in order.

*As an adult, it develops flowers and fruits.
Inside the fruits are the seeds from which new bean plants will grow.
The life cycle continues.*

Seed leaves, called cotyledons, provide the seedling with the energy it needs to grow.

*A root grows down.
A shoot grows up.*

A bean plant starts off a seed.

When the seed gets water and warmth, it germinates. It starts to grow.

*The seedling grows into a young plant.
Leaves begin to form.*
