

Ordering Mixed Numbers on a Number Line

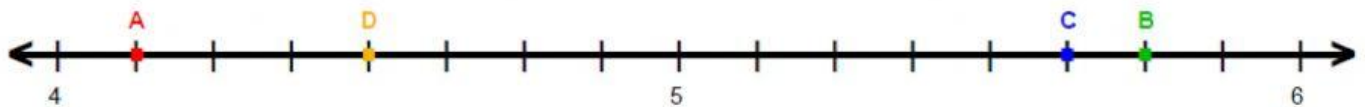

$$A = 6\frac{\quad}{2} \quad B = \frac{\quad}{2} \quad C = \frac{\quad}{2} \quad D = \frac{\quad}{2}$$

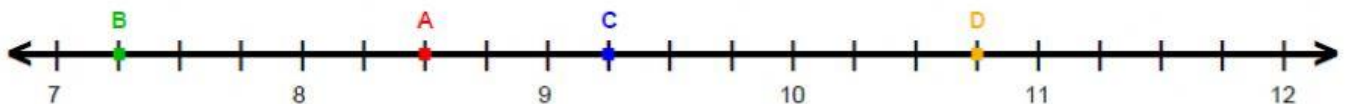

$$A = \frac{\quad}{7} \quad B = \frac{\quad}{7} \quad C = \frac{\quad}{7} \quad D = \frac{\quad}{7}$$

Order the fractions above from the largest. (write with letters)

$$A = \frac{\quad}{\quad} \quad B = \frac{\quad}{\quad} \quad C = \frac{\quad}{\quad} \quad D = \frac{\quad}{\quad}$$

Order the fractions above from the smallest. (write with letters)

$$A = \frac{\quad}{\quad} \quad B = \frac{\quad}{\quad} \quad C = \frac{\quad}{\quad} \quad D = \frac{\quad}{\quad}$$

Order the fractions above from the largest. (write with letters)
