

Cadenas y redes alimentarias

1) Completar:

- a) Una _____ alimentaria está formada por varias cadenas alimentarias interconectadas.
- b) Los seres _____ fabrican su propio alimento.
- c) Los seres _____ se alimentan de otros seres.
- d) Cuando un animal muere sus restos sirven de alimento para los _____.
- e) Cuando disminuye el número de especies de seres vivos que habitan nuestro planeta se produce pérdida de la _____.

2) Indica lo que representa cada esquema:

3) Arrastra la respuesta correcta :

The diagram illustrates an ecosystem with the following components and energy flow:

- a)** A plant (producer) with an empty box next to it.
- b)** An eagle (tertiary consumer) with an empty box next to it.
- c)** A rabbit (primary consumer) with an empty box next to it.
- d)** A snake (secondary consumer) with an empty box next to it.
- A mushroom (decomposer) is shown in the center.

Red arrows indicate the flow of energy:

- From the plant (a) to the rabbit (c).
- From the rabbit (c) to the snake (d).
- From the snake (d) to the eagle (b).
- From the snake (d) to the mushroom.
- From the eagle (b) to the mushroom.

On the right side, there are five draggable labels in boxes:

- Consumidor secundario
- descomponedor
- Consumidor terciario
- Consumidor primario
- productor
