**Read the text and say if the sentences are true or false.
(Click on the answer)**

Athletics is a summer sport. People who do athletics are called athletes. There are lots of different events in athletics and athletes do many different things. You can run, jump or throw. An example of a throwing event is javelin. A javelin is like a spear and you throw it as far as you can. The person who throws the javelin the longest distance is the winner. The world record for the javelin is more than 98 metres. There are lots of different running events, too. The shortest race is the 100 meters and the longest is 10,000 metres. The fastest runners can run 100 metres in less than 10 seconds. The 10,000 metres takes much longer. The world record for 10,000 metres in 2005 was 26 minutes and 17 seconds. Athletes who are first, second or third in their events get medals. The winner gets a gold medal, the person who comes second gets a silver medal and the person who comes third gets a bronze medal.

- 1 You can run, jump and throw in athletics events. True
- 2 Swimming is an athletics event. True
- 3 Javelin is a throwing event. True
- 4 The world record for the 100 metres race is 10 seconds. True
