Las divisiones

La división es una operación matemática inversa a la _____, y sirve para _____ una cantidad en partes _____.

Sus términos son:

A diagram illustrating the components of a division problem. It shows the equation $125 \overline{) 525} = 4 \text{ R } 1$. Colored arrows point to the terms: a blue arrow points to the dividend (125), an orange arrow points to the divisor (5), a green arrow points to the quotient (4), and a purple arrow points to the remainder (1).
