Subject: Mathematics

Algebra Home Work

Activity

Use the values of the letters to complete number sentences.

A. When $a = 13$, $b = 18$, $c = 20$ and $d = 27$, then

1) $a + c = ?$
 $\square + \square = \square$

4) $d - b = ?$
 $\square - \square = \square$

2) $c - a = ?$
 $\square - \square = \square$

5) $b + a = ?$
 $\square + \square = \square$

3) $b + d = ?$
 $\square + \square = \square$

B. If $r = 10$, $s = 8$, $t = 6$ and $u = 4$, then

6) $s + t + u = ?$
 $\square + \square + \square = \square$

9) $r + t - s = ?$
 $\square + \square - \square = \square$

7) $s - u + r = ?$
 $\square - \square + \square = \square$

10) $r + s + t = ?$
 $\square + \square + \square = \square$

8) $r + r - t = ?$
 $\square + \square - \square = \square$
