I'm not superstitious, honestly!

How (0) people could truly say they are not superstitious? A recent survey shows that almost 90% of people believe in one sort of superstition (9) another and say that it influences their lives.

One of the questions people (10) asked is whether they saw themselves as lucky or unlucky. Their answers turned out to be the most interesting aspect of this survey. Nearly two-thirds (11) those taking part said they believed that people were naturally lucky or unlucky.

Professor Morgan Howard, (12) analysed the results of the survey, was fascinated by this finding, so he went a step further and asked these people (13) kind of superstitions they believed in. (14) his surprise, he discovered that almost all the people who regarded themselves (15) lucky believed in positive superstitions. They did things to promote their good luck, such as crossing their fingers. (16) would appear that people make their own luck by their attitude to life.

POSSIBLE

Nobody should be particularly surprised by this development, which was predicted by experts years ago, and it's not (22) under the circumstances. One cause is the massive expansion of (23) into areas that were wild and uninhabited not long ago. In addition, over the past few decades a large number of (24) have been placed on hunting certain animals, allowing their populations to grow. It looks as if humans will simply have to get used to their new neighbours.
