Listen and read. Why are today's video games better?

Video Games: The Year 2000 and Now

Have you ever asked your parents which computer and video games they played when they were younger? Perhaps they played Pac-Man® or Donkey Kong®? Maybe they had a Game Boy® at home and enjoyed playing Tetris® on it? The changes to the computer and video games industry since your parents were young have been incredible. Even since the year 2000, new technology has changed how, where, and what people play, as well as who they play with. We have many more choices now than we used to.

How People Play and Who They Play With

In the year 2000, people played on game consoles, desktop computers, or in arcades. When they wanted to play with others, they invited them over to their houses, or they played alone. Some online games were available at the end of the 1990s, but they were expensive and not as many people had access to the Internet. Today, people can play games anywhere they want on portable gaming devices, phones, or tablets. They can play online with friends or even with other players from around the world.

What People Play

Games today have graphics that are sharper and more lifelike than they used to be, and new technology has made games more challenging, with more variety. Since 2000, Massively Multi-player Online games (MMOs) have become popular. People like to compete against each other for higher scores. They love virtual worlds that offer experiences they could never have in real life. Dancing and exercise games, as well as sports and adventure games, have also become popular.

This trend towards more choices and deeper involvement in virtual worlds will continue to change video games well into the future. Who knows what video games will be available when you are an adult! The children of the future will probably think that the games you play today are very old-fashioned!

14 Read **13** again and answer the questions.

- 1 How has new technology changed video games since the year 2000?

- 2 Why did few people play online games before the year 2000?

- 3 How are today's games different from those in the past?

- 4 Why do people like MMO games?
