

U.E.J. DAGOBERTO MONTENEGRO R.

SÉPTIMO AÑO - MATUTINO

MATEMÁTICA

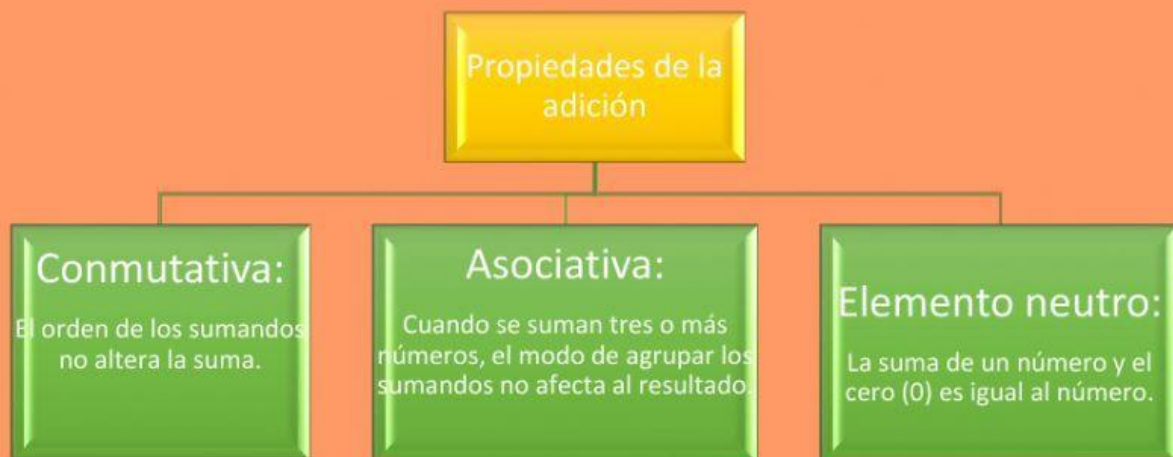

Tema: Propiedades de la adición.

Nombre y apellido:

Miss Fabiola Follin

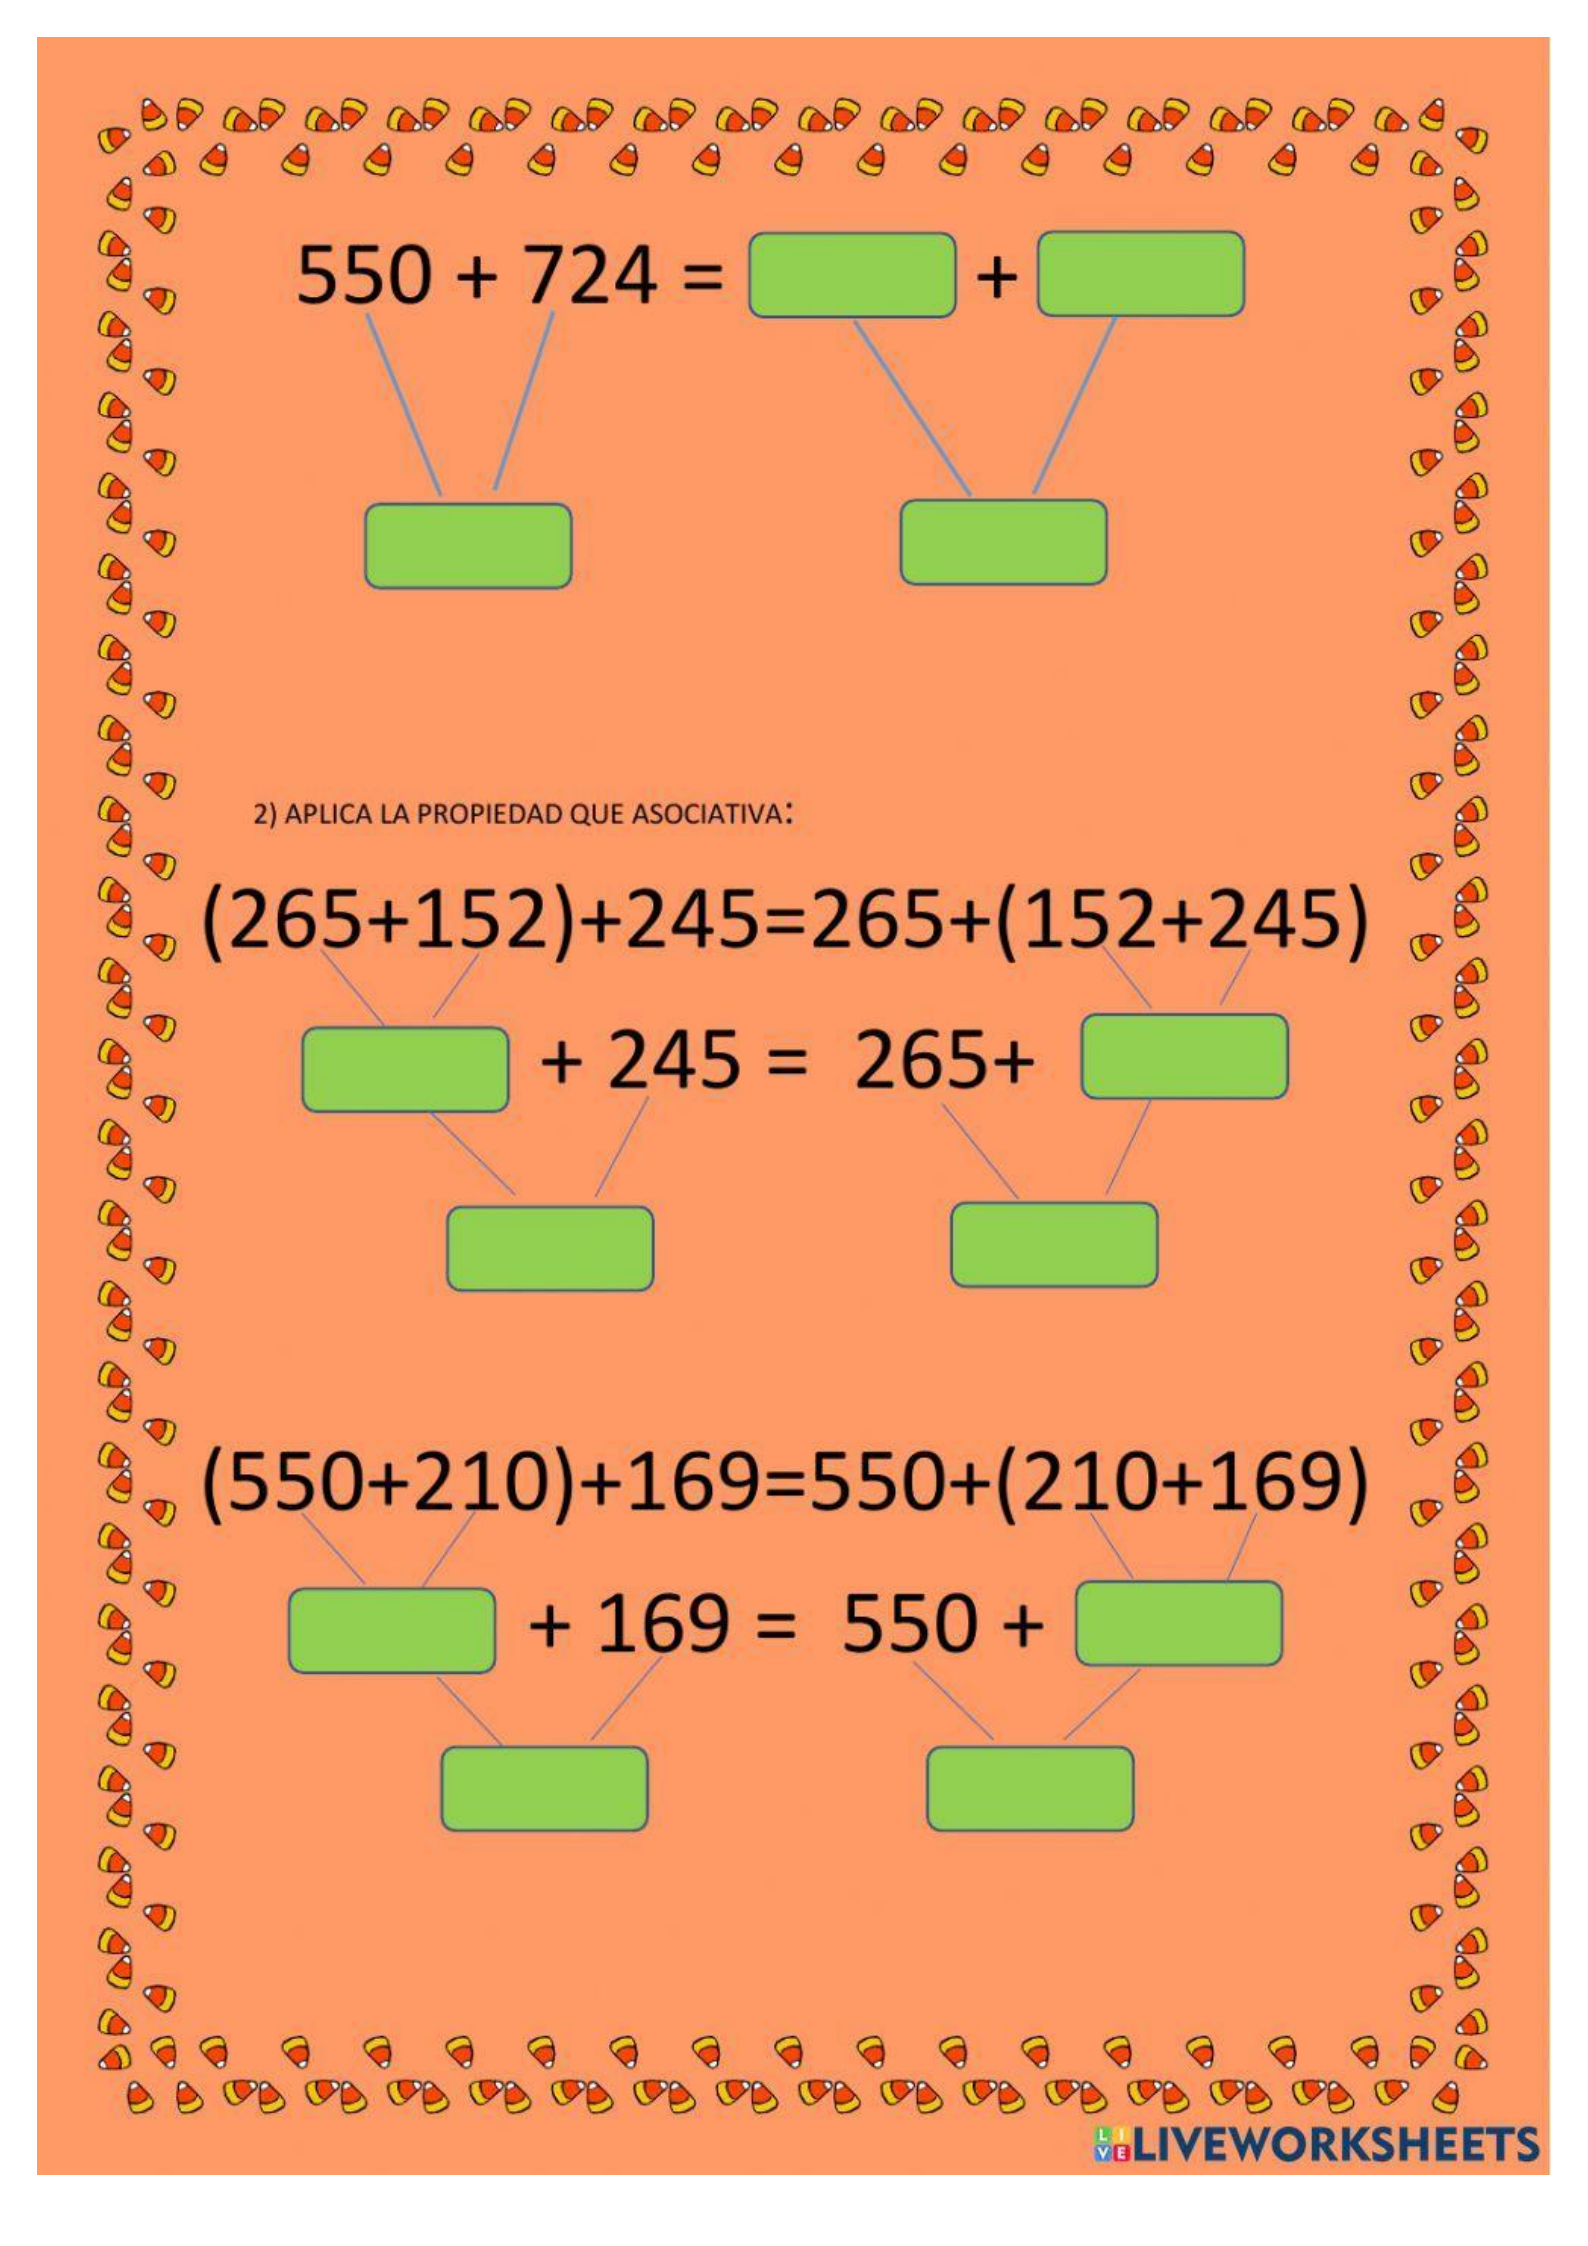

Propiedades de la adición

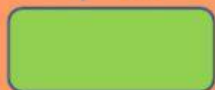

1)- APLICA LA PROPIEDAD CONMUTATIVA:

$$369 + 152 = \boxed{} + \boxed{}$$

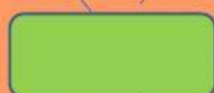

Diagram showing the application of the commutative property. The equation $369 + 152 =$ is followed by two empty boxes for the summands. Below each box is a larger empty box, connected by lines, indicating the summands to be swapped.

The worksheet has a decorative border of colorful candies. The main content is centered on an orange background.
$$550 + 724 = \boxed{} + \boxed{}$$

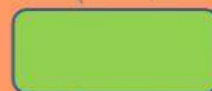

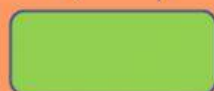

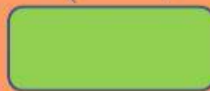

A green rectangular box intended for the number 550, connected to the first addend in the equation above by a blue line.A green rectangular box intended for the number 724, connected to the second addend in the equation above by a blue line.

2) APLICA LA PROPIEDAD QUE ASOCIATIVA:

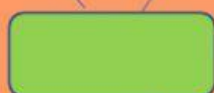

$$(265+152)+245=265+(152+245)$$

A green rectangular box intended for the number 265, connected to the first addend in the equation above by a blue line.

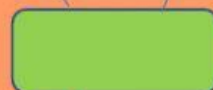

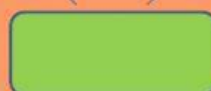

$$+ 245 = 265 +$$

A green rectangular box intended for the sum 152+245, connected to the second addend in the equation above by a blue line.A green rectangular box intended for the number 152, connected to the first addend in the equation above by a blue line.A green rectangular box intended for the number 245, connected to the second addend in the equation above by a blue line.

$$(550+210)+169=550+(210+169)$$

A green rectangular box intended for the number 550, connected to the first addend in the equation above by a blue line.

$$+ 169 = 550 +$$

A green rectangular box intended for the sum 210+169, connected to the second addend in the equation above by a blue line.A green rectangular box intended for the number 210, connected to the first addend in the equation above by a blue line.A green rectangular box intended for the number 169, connected to the second addend in the equation above by a blue line.

3) APLICA EL ELEMENTO NEUTRO:

$$6530 + 0 =$$

$$895 + 0 =$$

4) RELACIONA CADA EJERCICIO CON LA PROPIEDAD QUE CORRESPONDA:

$$(6 + 4) + 3 + 2 = 6 + (4 + 3) + 2$$

$$5 + 4 = 4 + 5$$

$$34\,590 + 0 = 34\,590$$

$$234 + 0 = 234$$

$$34 + 16 = 16 + 34$$

$$(18 + 3) + 17 = 18 + (3 + 17)$$

CONMUTATIVA

ELEMENTO NEUTRO
