

RACIOCÍNIO LÓGICO e GEOMETRIA

ROSANA NONATO

Na Geometria, as formas mais conhecidas de **FIGURAS PLANAS** são:

Quadrado	Retângulo	Paralelogramo	Losango	T...
				

Círculo	Triângulos	Pentágono	Hexágono
	 ou 		

HOJE FALAREMOS DE **PERÍMETROS.**

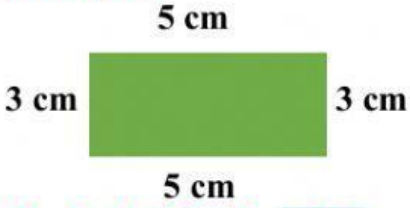

PERÍMETRO: é a soma de todos os lados de uma figura plana. Simples assim!

ATIVIDADE:

Vamos calcular o perímetro (P) de cada figura plana indicada.

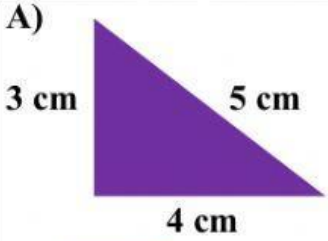

Faça a soma de "cabeça" e dê apenas o resultado.

Exemplo:

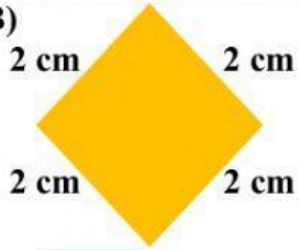

P = 5 + 3 + 5 + 3 = 16 **cm**

A)

P = ____ **cm**

B)

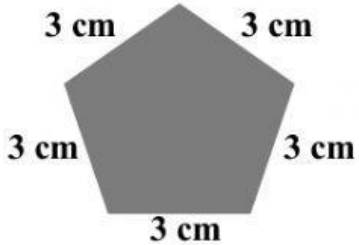

P = ____ **cm**

C)

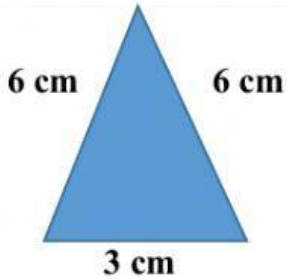

P = ____ **cm**

D)

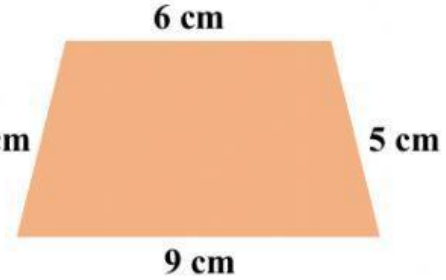

P = ____ **cm**

E)

P = ____ **cm**

F)

P = ____ **cm**
