### Addition Word Problems

Read each worded problem carefully. Type the addition sentence then find the sum.

1. Sita has 14 cats and Seema has 6 cats as well.  
How many cats do they have altogether?

$$\boxed{\quad} + \boxed{\quad} = \underline{\quad}$$

2. Tim had 12 orange balls.  
His brother gave him 4 purple balls.  
How many balls does Tim have in all?

$$\boxed{\quad} + \boxed{\quad} = \underline{\quad}$$

3. 10 birds were sitting on a tree branch.  
7 more birds landed on the tree branch.  
What is the total number of birds on the tree branch?

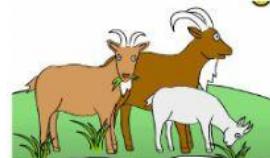

$$\boxed{\quad} + \boxed{\quad} = \underline{\quad}$$

4. A chicken lays 9 eggs in the front yard and 6 in the backyard.  
How many eggs the chicken laid in all?

$$\boxed{\quad} + \boxed{\quad} = \underline{\quad}$$

5. 9 goats are eating grass.  
9 more goats joined them.  
How many goats are eating grass altogether?

$$\boxed{\quad} + \boxed{\quad} = \underline{\quad}$$
