Health Tips

If you want to live a **healthy lifestyle** here's some **advice**.

You should get **enough** sleep. The CDC says: "Teenagers aged **13 to 18** years should sleep **8 to 10** hours" per day.

You shouldn't stay up late playing video games or studying. **If** you do not get enough rest, it can be hard to pay attention in class.

Remember to drink **plenty** of water! You should carry around a water bottle, especially during hot days.

It is important to eat a **well-balanced** and **nutritious** diet. You should eat lots of fruits and vegetables.

You shouldn't **overeat** or eat too little.

Don't forget to eat meat. Meat is a source of protein. **Protein** helps keep your muscles strong.

Healthy foods are full of important **vitamins** and minerals that help your body work properly.

You shouldn't eat too many **sugary** or **fatty** foods like junk food or fast food.

A diet with too much sugar and fat can lead to being **overweight**. Another way to take care of your body and prevent the **risk** of being **overweight** is to **exercise regularly**.

You can **stay fit** by doing activities like sports, yoga or cycling.

It is also important to **protect** your body from illness or being hurt.

If you do not want to get sick you should always wear a face mask in crowded places and **wash your hands regularly**.

You should always wear a **helmet** to protect your head when cycling or riding a motorbike. You should always remember to put on your **seatbelt** when riding in a car.

You shouldn't try to lift things that are too **heavy**.

Being healthy also includes **taking care of** your mind and **mental health**!

You can keep your brain healthy by doing puzzles or playing **board games** like chess.

You should always remember to **spend time** with family and friends. If you feel sad you should talk with friends or trusted adults about your problems so they can help you!

If you **follow my advice** and keep-up your **healthy habits**, you will live a **long** and healthy life!
