

ADICIÓN CON CANJE

Calcula las adiciones con canje. Luego marca la opción correcta.

$$1) \quad 581 + 126$$

A coordinate grid with x and y axes. A horizontal red line passes through the grid at $y = 2$. A red point is plotted at the coordinates $(3, 2)$, located in the first quadrant where the x and y values are both positive.

- a) 632
 - b) 735
 - c) 707

$$2) \quad 576 + 337$$

A coordinate grid with x and y axes. A horizontal red line is drawn across the grid at the y-value of 2. A single red point is plotted at the coordinates (3, 2).

- a) 913
 - b) 957
 - c) 910

$$3) \quad 589 + 258$$

A coordinate grid with x and y axes. A horizontal red line segment is drawn from the point $(-1, 0)$ to the point $(3, 0)$. A red point is marked at the coordinates $(3, 1)$.

- a) 847
 - b) 890
 - c) 980
