

Danger to the Environment

The more people there are, the more **products** they use. The use of these things creates wastes such as

rubbish, sewage and smoke. When we throw used things like **plastic bags, cans** and **empty bottles** on the street and gutters, they block the **drainage system**, streams and rivers causing **pollution**.

Not only do people pollute the land and water but also the sky. The amount of dangerous smoke from **cars, lorries** and **factories** is increasing rapidly making the air we breathe dangerous for our health.

We as **responsible citizens** must take care not to use plastic bags, nor should we **litter** the streets. Our cars, buses and lorries should be

smoke-free so that our environment is clean and healthy.

A) Pick out words from the passage that mean the following:

a) Things that we use ____ (para I)

b) Dirty water drains ____ (para I)

c) Make it dirty/poisonous ____ (para II)
