### UNIT 1 – CHANGING A TYRE

- Read the article below.
- Answer the questions based on the article.

#### Changing a flat tyre

Have you ever seen someone stranded on the side of the road? Maybe it's because their car got a flat tyre. Your plans can fall apart suddenly if a flat tyre stops you on the way to work or to the movies. It's not always something you can avoid. Most vehicles do have storage space for jacks and a spare tyre. The question is whether the person driving knows how to solve the problem.

This is how Saif changed his own tyre when he got a nail in his front left tyre.

He opened his trunk. He pulled out the spare tyre. He pulled out the jack. He pulled out the wheel nut wrench. He took the hubcap off the flat tyre. He jacked up the car. He took off all four wheel nuts.

He pulled the flat tyre off the car. He put the spare tyre on the car. He tightened the wheel nuts. He lowered the car to the ground. He put the hubcap on the spare tyre. He put the flat tyre into the trunk. He put the jack and the wheel nut wrench into the trunk. He shut the trunk. He went into his apartment and washed his hands. He phoned his boss to tell him that he will be late for work.
