Database

Search

Fields

A stores data in tables

Database can be used to and data easily.

II Write T for True and F for False in the box

1. Databases can store large numbers of records about most things.
2. It's quick and easy to find information in a database
3. Data in databases is always secure and can't be stolen.
4. Databases can keep information organised and give you the power to use it how you like.
5. Electronic databases can never accidentally get deleted or go wrong.
