_____

5. studying a lot / aren't I / to get into college / I'm /

_____

6. **Read and complete the sentences with words from the box.**

How many **personalities** do we **have**?

Personality is defined as *the combination of patterns of thinking, feeling and behaving that form an individual's character.* We may think that someone is sociable or friendly; or someone may think we are considerate or reasonable. These impressions usually come from a direct relationship with others. When we've spent time together at parties, in school or at home, our opinions are based on real experiences. But what happens when we're behind a screen? What happens with our personalities when we're online? Do we behave the same way in personal interactions as in digital ones?

People are spending endless hours online; that's a fact. According to recent studies, people now spend twice the time they spent 10 years ago, and over 40% of the time we are on the Internet is spent on social networking. Some interesting data has resulted from this research. It suggests that our behavior on social media reveals personality traits. For example, studies show that *likes* reflect how extroverted and friendly we are.

Some negative personality traits were also revealed. We may think our identities are "hidden," but are they really? For example, an excess of selfies indicates that a person may be obsessed with the image he / she projects.

Studies also indicate that other preferences reflect elements of a person's personality. The TV shows or movies we watch, the type of music we listen to and even what we buy reveal personality traits. One last question to consider: Why do so many people spend a lot of hours on social media and what does this say about them?

behaving experiences behavior personality image hidden

0. The three patterns included in the definition of personality are thinking, feeling and ___behaving___ .

1. The opinions we usually have about people are based on some real _____

2. Our _____ on social media reveals traits of our personality.

3. On the Internet, our personalities are not always really _____.

4. Selfies reveal that some people may be obsessed with their _____.

5. What we buy online also reflects our _____ traits.

7. **Listening**
