B. Someone who doesn't eat meat.

C. The food you eat every day.

D. How you look

E. Unkind behaviour

Take care of yourself

If you're aged 13–18, read our guide to staying healthy – both mentally and physically!

 A great way to look after your **health** is to take regular **exercise**. Try to exercise for at least one hour every day. Try new sports such as skateboarding or Zumba, or exercise outside with your friends – sport can be good for your **social life** as well as your health! Remember, exercise can also help with **stress**, so if you're preparing for exams, it might be a good idea to try a relaxing activity such as yoga.

 It's also important to eat a healthy **diet**. Eat three balanced meals every day plus two healthy snacks. You should eat five portions of fruit and vegetables every day. If you're a **vegetarian**, make sure you eat enough protein to help you grow.

 Remember to look after your mental health too. If you have problems at school or home, find an adult you can talk to, such as a school counsellor. He or she can help with issues like **bullying** and **depression**. Every **relationship** has good and bad moments, so it's normal to have **arguments** with friends and family. Always try to discuss your worries calmly with people who can help.

 Try not to worry about your **appearance** – remember that your body changes a lot when you're a teenager! If you eat healthily and take exercise, you'll look great too.
