

Complete with the best word from the box.

can't	don't	don't	must	will	won't
-------	-------	-------	------	------	-------

Example: Don't throw plastic bags into the sea.

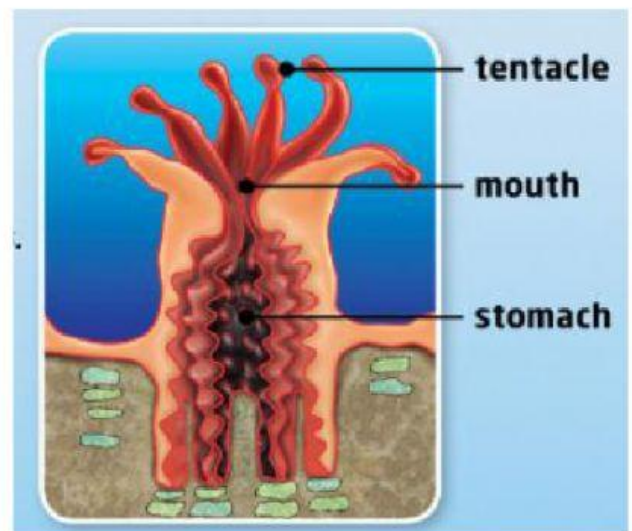

18. You _____ eat in the library. Take your food outside.
19. If there is a lot of pollution in the future, we _____ have healthy air and water.
20. _____ leave garbage in the classroom.
21. If there is an oil spill, fish _____ get sick or die.
22. We _____ protect the oceans.

Write *T* for True or *F* for False.

Colorful Coral

When you first see corals, you may think they are colorful underwater gardens. But corals are animals, not plants. Corals are made up of many small individual animals. Most corals live together in huge groups. As old corals die, new ones grow on top. Some corals are millions of years old. The coral reefs are home to many kinds of fish and other living things.

- ____ 23. Corals are colorful. _____
- ____ 24. Corals are plants. _____
- ____ 25. Most corals live alone. _____
- ____ 26. Corals are home to many kinds of fish. _____

Read and choose the best answer.

Oil Spills

Oil is used to make many things, including plastic, fuels, and everyday products, such as toothpaste and toys. Oil is transported across the oceans by big ships called *tankers*. If there's an accident during the transportation, the oil escapes into the ocean and causes pollution in the area. Accidents like this happened in the past and continue to happen today. Pollution makes the environment unsafe for plants, animals, and humans. Sea life and land life in the area get sick. Many plants and animals die. People can get sick too if we eat the seafood caught in the polluted area.

We must protect the oceans from oil pollution. Tankers must transport oil in a safe way. If there's an oil spill, it has to be cleaned up fast and in a safe way. But the best way to help the oceans from oil pollution is to use fewer oil-based products. Ride your bike, reuse clothes and electronics, and recycle plastic every time you can.

- ___ 27. Oil is used to make ____, fuels, and everyday products.
a. biodegradable b. garbage c. plastic
- ___ 28. Oil spills _____.
a. are only a problem now
b. were only a problem in the past
c. are a problem now and were a problem in the past
- ___ 29. Oil spills cause ____ and make the environment unsafe.
a. food b. pollution c. accident
- ___ 30. We ____ use fewer oil-based products in our daily lives.
a. have to b. can't c. don't

Listen and write T for True or F for False. TR: 1.2

- ___ 31. Plastic is biodegradable. ____
- ___ 32. Ocean animals eat plastic. ____
- ___ 33. You should throw plastic in the garbage. ____
- ___ 34. You should use something biodegradable when you can. ____
- ___ 35. A cloth bag is biodegradable. ____

36. **Writing**

Look at the first image. What do you see?

What will happen if there's a big oil spill?

Look at the second image. What do you see?

What can you tell someone who throws garbage in the ocean?
