No shower gel for a month!

Most people buy a lot of personal hygiene products. However, these products destroy the natural bacteria on your skin that clean and protect it. So I want to try an experiment. Can I live for one month with only a bar of soap for washing my hands?

Day 1: My skin feels really dirty.

Day 4: The skin under my arms is sore. 😞

Day 10: My hair looks disgusting!

Day 22: Wow! My skin feels great. Finally, the bacteria are helping! But I need some deodorant ... urgently ...

Day 31: It's the last day! I now know I must use deodorant every day and shampoo twice a week, but I don't need to use shower gel every day. The bacteria on my skin do a great job, and they don't cost any money! 😊😊😊

VOCABULARY: Personal Hygiene products
