

Student's name: _____

Germs

Sometimes you don't feel well. You catch bad things called germs. Germs are small. You can't see them. How do you know when you have germ?

You may have a cold or a cough. You may have a fever or a runny nose. A fever fights germ. Your body gets hot and germs die. A runny nose fights germ, too. Germs die when you blow your nose.

What should you do when you have germs? Don't spread the germs to your friends. You should wash your hands often. You take medicine and drink lots of liquids, like water or tea. But the most important thing is to get some rest.

A. Look at the picture and write the words.
