Chapter 3

TYPES OF COMPUTER

INTRODUCTION

All the computers used at offices, homes, hospitals and research centers are not same. They may be different in processing speed, performing tasks, storage capacity and size. They may be special purpose computers or general purpose computers. The special purpose computer can perform only one specific task. The general purpose computer can perform a variety of tasks. Most commonly used computers are general purpose computers.

TYPES OF COMPUTER

There are three types of computers on the basis of task. They are analog, digital and hybrid computers.

i. Analog computer
