

Mathematics Year 2

Division with remainder (divide 2 digit numbers with one digit number)

Good morning boys and girls. To begin with our lesson today let's do some revision from our last lesson by answering the quiz from the link below:

<https://wordwall.net/play/18732/373/874>

Part 2 : Learn Division with remainder. Watch the video below:

Part 3 : Try and solve the question given below. To help you, the time tables are provided.

Divide

$$\begin{array}{r} 5 \overline{) 48} \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 6 \overline{) 57} \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 3 \overline{) 68} \\ - \\ \hline \downarrow \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 7 \overline{) 48} \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 4 \overline{) 89} \\ - \\ \hline \downarrow \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 8 \overline{) 59} \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 9 \overline{) 44} \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 2 \overline{) 67} \\ - \\ \hline \downarrow \\ - \\ \hline \end{array}$$

$$\begin{array}{r} 2 \overline{) 29} \\ - \\ \hline \downarrow \\ - \\ \hline \end{array}$$
