

Área de: Trapecio y Paralelogramo.

1. Calcula el Área de los siguientes Trapecios.

 $\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$ A = m²	 $\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$ A = cm²
---	---

 $\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$ A = cm²	 $\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$ A = m²
--	--

2. Calcula el Área de los siguientes Paralelogramos.

$$A = \boxed{} \text{ cm}^2$$

$$b \cdot h =$$

$$A = \boxed{} \text{ cm}^2$$

$$b \cdot h =$$

$$A = \boxed{} \text{ cm}^2$$

$$b \cdot h =$$
