Sally Yates ☐

I used to have a little blue Fiat 500. Oh, I loved that car. It was so much fun. We used to live in the city center, so this car was perfect for driving through the narrow streets. And something fell off almost every time I went out in it. I remember when the windshield wipers fell off in the middle of a storm. The sunroof also leaked so we only drove it on sunny days. I miss that car. Modern cars don't have any character.

I won my first car in a competition – a soft-top Porsche in bright yellow. It had a very powerful car engine for a young guy like me! I remember it had black leather seats. Every weekend, we used to go down to the coast and just drive around. One day, I parked it with the roof down in the sun. The seats were SO hot we couldn't sit in it until the sun went down. One day it simply stopped working. It's still the best car I've ever had – and I'm forty now!

Cecilia Suarez ☐

My first car was originally my brother's. He used to love that car, but then he moved overseas and so the car became mine. It was a red BMW from 1974. It was already old when I got it! And it wasn't a big car. I remember one weekend we went to the city with some friends. There were about six of us in the car. And because the trunk was so small, we put the bags on the roof. Of course, when we got to the city the bags weren't in great shape – and a couple were not there! We used to have a good time in that car – I wonder where it is now!
