Name : _____ Age: _____ Date: _____

LIFE IN THE FUTURE

CHOOSE THE CORRECT ANSWERS.

In the future, most likely we, humans will live on one of the planets or a planet man discovered themselves. There will not be 1(any / many) food. There is no need to have pieces of land to cultivate 2(their / theirs) food. Just pop in a pill, and that is food 3(to / for) the whole day. People will not 4(go / going) hungry or thirsty. All they have to do is relax 5(in / at) their house. Their house is just like a spaceship, which transports 6(they / them) to any place they like. What they need to do is 'push' 7(a / the) button then they are going to unknown lands to enjoy themselves.

There will not be 8(many / much) communication among people as they do not need to depend on others. The only form of communication 9(between / among) family members is through a special 10(chip / chips) in their earphones. Life is so relaxed and peaceful.

I don't think that life would be happier in the future. It is because life in the future will be very mechanical and cold. Everything 11(go / goes) through a machine or device. People are so 12(addicting / addicted) to metal devices!

"The future belongs to those who believe in the beauty of their dreams." - Eleanor Roosevelt

"The future depends on what we do in the present." - Mahatma Gandhi

"The best way to predict future is to create it." - Abraham Lincoln

"The future starts today, not tomorrow." - Pope John Paul II
